

**ACE
COFFEE
CO.**

Have you tried our new and exclusive Cold Brew Coffee yet?

- No heat
- More caffeine
- ALL flavor

What is Cold Brew Coffee?

It is freshly roasted, coarsely ground organic coffee that has been steeped in cold water for 24 hours, thus replacing heat with time. The absence of heat changes the taste profile of the coffee as the flavor is less acidic allowing the coffee's natural sweetness to shine. Because the coffee is made with cold water, it's generally mellower and tastes more rounded out.

We have partnered with local roaster, Ace Coffee Co. to make this Cold Brew available in:

- 5 gallon chilled kegs on-tap
- ½ gallon and 1 gallon containers of concentrate

Specifications:

Dimensions: 52" H x 20" W x 31" D
Height includes kegerator and tap. Depth includes kegerator and nitrogen tank
Electrical: 120V ac
Retail 2 keg capacity kegerator shown.
Other models are available.

Enjoy a refreshing Cold Brew any time of the year!

Your Coffee-Break Will Never Be The Same
