

NEWCO
ENTERPRISES, INC.

Introducing The Fresh Cup 3 pod brewer from Newco Enterprises - a leader in office coffee technology.

No matter how you might enjoy your coffee, Fresh Cup always brews it to perfection and allows each cup to be specially brewed to three personal strengths: mild, medium or bold. This model offers a sleek design that looks great in any office space!

Pods are freshly ground coffee enclosed in individually wrapped filter paper. Tear open one of our sealed gourmet pods and immediately experience the wonderful coffee aroma that you simply cannot get from a sealed plastic capsule. Pods allow for the best extraction possible because wonderful aromatics and dissolved coffee solids are allowed to pass to your cup.

Fresh Cup 3 Specifications:

Dimensions: 18" H x 9.25" W x 20" D

Electrical: 120V ac

Plumbing: 1/4" plumbed cold water

Features include:

- Cups sizes: 8oz, 10oz, 12oz (can set different sizes)
- 3 brew strengths
- One touch brew activation
- Quiet brewing and ejection of pods
- Back-to-back brew cycles
- Hot water option
- Power save mode
- Direct water line plumbed

Did you know how sustainable pods can be? 

- By using pods, there is an 85% reduction in landfill impact compared to most other systems.
- Recycled coffee grounds are rich in nitrogen which makes them a "green" composting material.
- Even if you don't recycle your spent pods, they will still break down within 90 days in a landfill.

Your Coffee-Break Will Never Be The Same
